

PC GROUP

Chairman's Report - April 2011

We continue to get a good attendance at our monthly meetings, and our membership now stands at 50, an increase since last year.

We had another varied programme of presentations and discussions through year as listed below:

2010		
17 May	Ladies Lunch	
16 June	Windows XP vs 7	John Steel & Seb Welford
21 July	Video Editing	Ron Everitt
17 August	Open Forum	John Steel
15 September	Graphic Processors and the iPad	Tony Barnes
20 October	MS Word problems	Seb Welford
17 November	Transmitter Networks and Digital Handover	David Goddard
8 December	Mince Pies & Open Forum	
2011		
19 January	Digital Terrestrial Television	Keith Hayler
16 February	Protocols (What does it all mean)	Chris Rosenberg
March 16	Tables in Word, Excel & Access	Leslie Haddow

We continue to be indebted to Ron Everitt for the production of the Newsletter and to Leslie Haddow for keeping the Problem Page going.

Due to the difficulty in getting outside speakers we are heavily dependent on members to give talks.

We are now getting IET funding for all of our meetings, with the exception of the Ladies Lunch. Without this support our subscription rate would be significantly higher.

Don Andrews has continued to look after the refreshments for our meetings and has arranged the lunch orders with the Six Bells. Always cheerfully carried out, these chores are greatly appreciated by us all. Thank you Don.

I would like to thank the whole Committee for the strong support I have received from them over the last year. Due to Roy Steven's illness I stayed on as Chairman for an extra year. The future of the Group will be in jeopardy if we do not receive new nominations for the Committee.

Due to Cecil Ives being ill, David Goddard has kindly stepped in to organise the Ladies Lunch this year.
